Performance Marketer | Meta Ads | Scaling D2C &
Funnels

About me

I'm a Meta Ads specialist focused on building profitable, scalable funnels for e-commerce and digital brands.

I've managed performance campaigns across multiple niches, improving ROAS through product diversification, seasonal strategy, creative testing, and conversion rate optimization. Rather than chasing short-term wins, I focus on building stable ad structures that continue performing even as products, seasons, and budgets change.

Collaborated With

NURSERY BRAND CASE STUDY

How We Turned a Seasonal Plant Shop Into a High-ROAS, Multi-Crore E-Commerce Brand.

Brand name changed for confidentiality purposes.

1. Introduction The Growth Problem

Nursery Brand is a fast-growing Indian e-commerce brand selling exotic plants, bulbs, lotus tubers, fruiting plants, aquatic plants, and indoor-outdoor plants. With 10,000+ customers in just 2 years, their product catalog is unique, especially in the Indian market where hardly anyone sells rare fruiting plants.

They approached us with the goal of:

- Improving ROAS
- Increasing monthly sales
- Stabilizing performance across seasons
- Expanding beyond a single hero product

They had an existing customer base but struggled with consistency in performance and product diversification.

2. Background Understanding the Brand & Market

What Makes Nursery Brand Special

- Only Indian brand selling such a wide variety of exotic fruiting plants
- Loyal gardener & home décor audience
- Strong retention through seasonal product lines

Who Buys Their Products

- Hobbyist gardeners
- Home décor lovers
- People who want exotic plants not sold in nurseries
- Factories & large properties looking for fruiting plants
- Customers looking for seasonal/rare varieties like saffron bulbs & lotus tubers

2. Background Understanding the Brand & Market

Before We Took Over

- Q1 ROAS was low (2.04 in March)
- Brand was running the same creative style for months
- No product diversification in ads
- No educational content
- Seasonal demand fluctuated, but ads didn't

3. The Turning Point Taking Over in April

When I took over the Meta Ads account in April:

- Spend: ₹1,17,000
- Sales: ₹3,71,000
- ROAS: 3.15

Good, but not scalable. In early May, a major dip happened. Brazilian Wood stopped performing. Instead of “fixing” the old winning product, we made the bold decision:

3. The Turning Point Taking Over in April

We diversified the product catalog.

We introduced:

- Aquatic plants
- Lotus tubers
- Fruiting plants
- Saffron bulbs
- Cymbidium bulbs
- Tulip bulbs
- Miyazaki Mango
- HRMN99 Apple
- Pachira Money Tree

This one strategic shift became the foundation of the next 6 months of growth.

4. Strategy Building a Seasonal, Full-Funnel Engine

4.1 Creative Strategy

We used only video creatives, but with a new angle:
Educational + History-Based Videos

- How to plant
- Who created this plant variety
- Origin of the species
- Best months for planting
- Expected results & growth journey

This creative style had:

✓ Highest CTR ✓ Strongest watch time ✓ Best conversion intent

Because gardeners want to learn before they buy

4. Strategy Building a Seasonal, Full-Funnel Engine

4.2 Funnel Structure

TOFU – Awareness

- Broad + interest audiences
- Education-focused videos
- Seasonal awareness (Winter bulbs / Summer lotus / Monsoon fruits)

MOFU – Warm Nurture

- Instagram engaged audiences
- 25%+ video viewers
- Lookalike audiences based on ATC/IC BOFU – Sales
- ATC (Add to Cart)
- IC (Initiate Checkout)
- Recent visitors

BOFU – Sales

- ATC (Add to Cart)
- IC (Initiate Checkout)
- Recent visitors
- Catalog retargeting

High Performance Channels

- ATC + IC custom audiences
- 1% and 2% LAL audiences
- Seasonal product-specific retargeting

5. Seasonal Insights Cracking the Market

The plant niche is seasonal — and we used that to scale.

Winter → Bulbs Collection

- Tulips, Cymbidium, and winter bulbs worked beautifully
- High ROAS + low CPP

Summer → Aquatic Plants

- Lotus tubers became a top-seller
- Strong demand with low competition

Monsoon → Fruiting Plants

- Mango plants
- Apple HRMN99
- Saffron bulbs
- Pachira money trees

Each season produced a new hero product → NEW scalability window.

6. Quarterly Performance The Growth Story in Numbers

Q1 (Before Optimization – Jan to Mar)

- Spend: ₹823,436
- Sales: ₹1,721,431
- Orders: 1,723
- ROAS: 2.09
- Conversion Rate: 2.22%
- CPP: ₹477

This was the baseline. We needed improvement.

The screenshot shows a Google Ads 'Campaigns' table for the period of 1 Jan 2025 to 31 Mar 2025. The table lists various campaigns with columns for 'Amount spent', 'Purchases', 'Website purchases', 'Meta purchases', 'Cost per purchase', 'Purchase ROAS', and 'Website purchase'. At the bottom, a summary row is highlighted with red boxes, showing a total spend of ₹823,436.88, 1,594 purchases, and an average cost per purchase of ₹516.59.

7. Biggest Breakthrough The Product Mix Strategy

The turning point was not one creative or one campaign.

It was the product diversification strategy.

Brazilian Wood → finished Immediately replaced with:

- Lotus tubers (Summer hero)
- Fruiting plants (Monsoon hero)
- Winter bulbs (Winter hero)

This ensured:

- Less competition
- High intent buyers
- Strong margin
- Year-round demand

8. Client Satisfaction & Long-Term Success

While the founder didn't provide quotes, they loved the results:

- ✓ ROAS doubled within 1 quarter
- ✓ We scaled from ₹3.7 lakh/month → ₹11 lakh/month
- ✓ Retained as long-term performance partner
- ✓ They trust us for product launches & seasonal scaling

9. Future Roadmap

What's next for the brand?

- Continue product testing
- Scale existing proven products
- Build stronger UGC video library
- Optimize for festival seasons
- Higher-budget experiments with new categories

Long-Term Vision

Build Nursery Brand into the #1 online exotic plant marketplace in India.

10. Final Outcome The Transformation Story

When Nursery Brand came to us, they were dependent on a single product with dipping sales and unstable performance.

Today, the brand has:

- 8,400+ orders
- Strong product diversification
- A high-ROAS advertising engine
- Month-on-month scalability
- A stable performance foundation

This is the story of how a seasonal, niche brand became a multi-crore e-commerce success through creative intelligence, seasonal strategy, and funnel mastery.

Client Feedback

PIU SNOOZE CASE STUDY

Scaling a women's sleepwear brand to ₹1 lakh revenue in November.

1. About the Brand

PiuSnooze is a sleepwear brand founded in 2013 offering:

- Pajama Sets
- Sleep Shirts
- Gowns
- Jammies
- T-Shirts
- Various premium nightwear categories

The brand focuses on:

- Premium-quality fabrics
- Superior comfort and fit
- Trendy prints and elegant designs
- High variety of styles

2. Business Challenges Before We Started

When PiuSnooze approached us, they were facing:

- Low and unstable sales
- High cost per purchase (CPP)
- No proper ad funnel
- Website conversion drop (2.5% → 1.63%)
- No quick checkout option
- Creative fatigue (videos not performing)

Baseline before we started:

- Average revenue (July–Oct): ₹22,400/month
- Average orders: 12–13 orders/month

They needed a structured ad funnel + consistent sales + website optimization.

3. Marketing Goal

The brand had one clear objective:

★ Increase Sales.

No aggressive scaling in the beginning, just stable, profitable growth + learning what works.

We planned to test multiple ad formats later, but first aimed for:

- ✓ High ROAS
- ✓ Lower CPP
- ✓ Strong purchase intent traffic
- ✓ Clean funnel foundation

Who Buys Piu Snooze?

Based on Meta Ads data:

Women aged 25–34 and 35–44 — mostly moms, working professionals, and home-wear lovers.

4. Creative Strategy

We tested:

- Videos
- Product reels
- Lifestyle creatives
- UGC-style content

But surprisingly...

Only Catalogue Ads Worked Exceptionally Well

In November:

- ROAS: 4.21
- Best CPP: ₹514
- Highest-ever revenue: ₹1,04,106

Why it worked:

- Strong product images
- Auto-optimized delivery
- Showed multiple product Variations
- High purchase intent audience

Catalogue ads became the backbone of scaling

5. Funnel Strategy

Since the brand was still new in digital marketing, we kept the funnel simple:

Top of Funnel (TOF)

- Broad + interest-based audiences
- Aim: Build data, traffic, and website events

Middle of Funnel (MOF)

- Engaged audience
- Viewed content
- Add-to-cart users

Bottom of Funnel (BOF)

- Retargeting website visitors
- Viewed product but didn't buy

Lookalikes

Based on:

- View content
- Add-to-cart
- Initiate checkout

This simple funnel structure turned out to be the biggest breakthrough.

6. Website Optimization

Two major changes transformed performance:

① Brand Color & Website Theme Update

→ More premium, trustworthy, aesthetic look

② Quick Checkout Button Added

→ Faster conversions

→ Less drop-off

→ Better mobile flow

Impact:

Purchase conversion rate improved:

- 1.63% → 2.14% in November

Without this improvement, scaling would not have been possible.

7. Monthly Performance

Monthly Report (July-Nov'25)									
Date	Total Sales	Total Orders	Amount Spent	ROAS	AOV	CPP	Website landing page views	Purchase Conversion Rate	CTR

8. What Changed? (Before vs After)

Before (July-Oct):

- ₹22,400 monthly sales avg
- 12-13 orders monthly
- 1.63% conversion rate
- Weak creatives
- No funnel structure
- High CPP

After (November):

- ₹1,04,106 Sales (+363%)
- 48 Orders
- 2.14% Conversion Rate
- ROAS 4.21
- Catalogue ads delivering maximum revenue
- Lower CPP (₹514)

9. The Biggest Breakthrough

The turning point was:

★ A simple funnel + catalogue ad scaling + website optimization

This combination alone generated:

- ₹1 lakh+ revenue
- ROAS above 4.2
- High purchase intent audience
- Strong website conversion

All this with just:

👉 ₹25,000 ad spend

The screenshot shows a Google Ads interface with a table of campaign performance. The table has columns for Campaigns, Amount spent, Purchases, Website purchases, Cost per purchase, Purchase ROAS, and Purchase conversion value. The data is filtered for the last month (1 Nov 2025 - 30 Nov 2025). The table shows results for 10 campaigns, with a total spend of ₹24,869.25 and a total purchase value of ₹72,636.00. The average ROAS is 2.92.

10. Future Plans

We are continuing to manage PiuSnooze's ad account with focus on:

- ✓ Testing new creative styles
- ✓ Scaling best-performing catalogue ads
- ✓ Experimenting with festival/seasonal campaigns
- ✓ Lookalike audience expansion
- ✓ Custom audience layering
- ✓ Improving AOV through bundles
- ✓ Higher CRO testing on website

The goal: **Build a larger, stronger funnel and scale sustainably.**

CASE STUDY SUMMARY SLIDE

In just one month:

- Sales grew from ₹22,400 → ₹1,04,106
- Orders increased from 12 → 48
- ROAS rose to 4.21
- Catalogue ads proved to be the biggest revenue driver
- Website conversion rate increased from 1.63% → 2.14%

A simple, properly structured strategy created a 363% growth in 30 days.

BASSLILA MUSIC CASE STUDY

A 17-Day Meta Ads Campaign for Webinar + High-Ticket Course Funnel

Introduction- The Brand & Opportunity

Basslila is an Indian music academy offering beginner-friendly and advanced music production education through online & offline programs.

Their aim:

👉 Make high-quality music education accessible, affordable, and industry-relevant for aspiring creators.

They teach:

- Music Production
- DAW Workflow (FL Studio, Ableton)
- Music Theory
- Sound Design
- Mixing & Mastering

The ₹499 Webinar Offering

The 4.5-hour webinar included:

- Essential equipment & setup
- Introduction to DAWs
- Music theory basics
- Drum programming
- Recording vocals
- Full track creation walkthrough
- Promotion strategy
- Live Q&A
- Free bonus music production packs

This webinar acted as the **front-end offer** to attract serious learners into their ecosystem.

High-Ticket Backend Offer (₹70,000 Course)

2 participants purchased Basslila's **4-month advanced music production program**, which includes:

- Live online weekend classes
- Complete production curriculum
- Track arrangement, mixing & mastering
- Music theory
- Sound design
- Lifetime doubt-clearing sessions
- Completion certificate

With upfront discount: ₹60,000 option also available.

Challenges Before We Started

Since this was Basslila's first ever paid webinar, the challenges were:

- No previous paid webinar data
- No established ad funnel
- No tested audiences
- No proven creative angle
- Competition in online music courses

However, Basslila had a strong **organic base of 1.41 lakh YouTube subscribers**, which gave us room to build trust quickly.

Marketing Goals

Basslila expected:

- 🎯 120+ webinar signups (achieved)
- 🎯 At least 4–6 high-ticket course conversions (we got 2)
- 🎯 Build a warm audience for future launches
- 🎯 Test Meta ads for the first time and evaluate scalability

This campaign acted as a trial to understand user behavior and validate demand.

Funnel Strategy (17-Day Growth Funnel)

Top-of-Funnel (TOF):

- Interests: Music, production, courses, arts
- Broad audiences
- Multiple testing layers

Middle-of-Funnel:

- People who visited the landing page
- People who engaged with videos
- Retargeting with strong “last chance” hooks

Bottom-of-Funnel:

- Users who reached Razorpay page
- Reminder ads close to webinar date

Each stage used video creatives, making the funnel trust-driven.

Creative Strategy

We tested multiple instructor-led, value-driven videos:

- Instructor explaining “how to create music”
- Software (DAW) walkthrough clips
- Roadmap videos: beginner → artist journey
- One creative demonstrating actual music creation

★ **Winning Creative Theme:**

- Instructor video + roadmap storytelling. This built the highest trust and attracted serious learners.

Performance Breakdown

Meta Ads Performance:

- Amount Spent: ₹43,209.88
- Webinar Purchases: 120+
- Ticket Price: ₹499
- Total Webinar Revenue: ₹59,880

Biggest Breakthrough

The combination that delivered results:

- ✓ High-quality instructor-led videos
- ✓ Strong value demonstration (roadmap + DAW workflow)
- ✓ Retargeting warm audiences from landing page views
- ✓ Basslila's existing YouTube authority (big trust factor)

This mix brought qualified, serious learners into the webinar and helped close 2 high-ticket sales.

Client Feedback

“Great execution for our first-ever webinar. The funnel brought in serious learners, and the backend sales validated our audience demand.”

Thank You!
